DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. The application has been amended as follows:
 - a. Replace the abstract with -- The invention relates to a fabric treatment composition which comprises a self-crosslinking polymer possessing pendant azetidinium groups. A first aspect of the invention comprises an azetidinium functionalised polymer containing primary or secondary amine groups. Cross-linking reactions between the azetidinium group and primary or secondary amine groups do not form quaternary groups and consequently do not result in a charged, cross-linked polymer. This lack of charge is believed to overcome the problems of stain fixing and dye adsorption. A second aspect of the present invention subsists in an azetidinium functionalised polymer of which the monomers comprise: an amino-acrylate and/or amino-alkacrylate monomer, and, optionally, further non-amino acrylate and/or alkacrylate monomer. A third aspect of the present invention provides a textile treatment composition which comprises

an azetidinium functionalised polymer in accordance with the first or second aspect of the invention and a textile compatible carrier. —

- b. In claim 1, line 3, after “monomers”, add — of the polymer—
- c. In claim 5, 2nd line from last, replace "and," with -- and —
- d. In claim 6, line 2, replace ", and," with -- and —
- e. In claim 7, 2nd line from last, replace 'thereof,' with -- thereof and --
- f. In claim 9, line 4, replace ", and," with -- and —
- g. In claim 11, line 7, replace ", and," with -- and —

REASONS FOR ALLOWANCE

3. The claims are allowable over the closest prior art of record, Nagasuna et al. (US 6,297,319) because the prior art do not teach polymers comprising the azetidinium groups instantly claimed. The azetidinium groups of Nagasuna et al. will be used up during the crosslinking step.

Conclusion
